Coral Series Pedal

The contents of this manual are subject to change without notice.

FEATURES

- Mini digital amp modeling/preamp stompbox
- 16 carefully selected vintage/modern amplifier types ranging from clean to hi gain
- Convenient A / B channel switching for awesome live experience
- Switchable, dedicated cab sims for recording or direct-to-PA
- Special design buffer bypass circuit keeps your sound pristine
- Transparent, readily accessible knobs with LEDs
- Aluminum-alloy die cast casing withstands wear and tear
- Great tone with low noise level

CONTROLS

VOL.: Controls the output volume

LOW/MID/HIGH: Controls the low/mid/high EQ parameters

GAIN: Controls the gain

CAB SIM: Turns cab sim on (LED flashing)/off (LED solid). Turn cab sim off before connecting to an amp

AMP TYPE: Selects your amp type (the LED will flash quickly when switched to a different amp type)

FOOTSWITCH:
Select amplifier A / B channel
Channel A: green LED
Channel B: red LED

HOLD: Bypass (the unit will be set to bypass when you connect the power jack, tap once to turn on)

NOTE: All settings will be automatically saved when you switch channels or power off, and all knob positions will be ignored if no parameter change happens after saving. If you find the knob positions and actual sound doesn't match, try to adjust the knobs.

SPECIFICATIONS

Power Requirement: 9V DC center negative

Current Consumption: 200mA

Dimensions: 93.5mm (D) x 42mm (W) x 52mm (H)

Weight: 150g

The FCC regulation warning (for U.S.A.)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.
